

Job Description – Investment Analyst

About EEAM

Evolution Environmental Asset Management, LP (“EEAM”) is a US based cutting-edge asset manager at the intersection of traditional investment funds and environmental markets. Powered by an investment team with decades of experience in the environmental markets supported by world-class infrastructure, EEAM employs carbon finance to help scale up premium climate solutions globally. As seasoned environmental markets pioneers, the team is uniquely qualified to capitalize on emerging environmental opportunities. All investment decisions are guided by a strict best-in-class ESG framework.

Job Description

EEAM is looking for a full time Associate/Analyst to support the growth of the business and its investment process focused on acquiring and trading environmental commodities with high and measurable impacts on sustainable development goals. This role offers the unique opportunity to join a fast-growing and dynamic organisation in an exciting and newly created role based in Greenwich, CT.

Role and Responsibilities

- Support the company in developing and maintaining its financial models, analytical and risk management tools, trading/sales strategies, and investment process
- Undertake industry research, financial analysis, and due diligence on target companies and projects
- Monitor the investment portfolio performance including supporting risk management, trading strategies, identifying engagement areas with partners and exit opportunities

Skills and Experience

EEAM is looking for candidates that have:

- 3-8 years’ experience, ideally with a track record of project, growth capital or environmental commodity investing/trading with a leading financial institution or corporate
- Strong financial modelling and presentation skills
- Experience with ESG investing/and or carbon markets will be an advantage
- Ability to thrive in a start-up and fast paced environment

EVOLUTION ENVIRONMENTAL

ASSET MANAGEMENT

- Entrepreneurial mindset with strong sense of ownership
- Excellent oral and written English (additional languages a plus)
- Degree and/or Postgraduate degree in business, accounting, finance, or other related subjects

EEAM offers you to...

- Dive deep into emerging carbon and environmental markets
- Work with seasoned carbon market veterans and deepen your understanding of trading and investment skills
- Work with a talented team in a truly global business environment
- Make real impact with your work
